Instructions:

- 1, When the surface attachment isolator adopts reflow welding process, the maximum temperature does not exceed 260 degrees;
- 2, The reflected power is only 10W, if you need more can use the way of circulator plus resistance;
- 3, Only some common frequencies in the table, can be produced according to the user's requirements;
- 4, If you do not find what you are looking for, please contact us!
